

CSS

color

Background-color

using class Name

(.) dot operator
must be used

using id

(#) Hash tag

must be used.

font-family

use two or
three fonts
if one didn't
work another
one -

font-style

italics

font-weight

fon - wagn

Bold

Bolder

lighter

Normal

500 , 600 , 700

Border

Border-style

Border-width

Border-Color

Border-Radius

rounded the
edges

Padding

distance between
text and border

We can create

individual sides
A border too.

like

border-top-color

Border-bottom-
radius

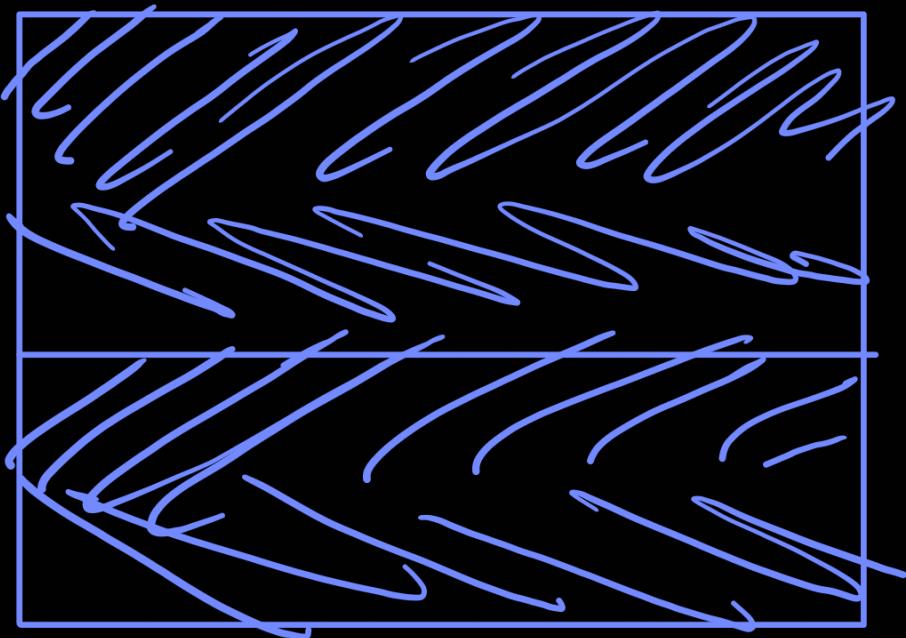

Background

Background: linear

-gradient(2 colors)

↓
This will repeat
after one block

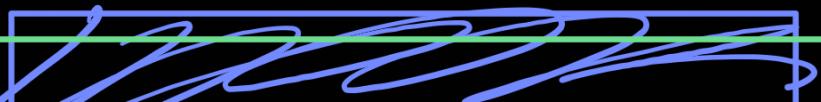

like

Background - repeat:

MUST
TO DO

no-repeat

Background-attachment:
fixed . ^{must} _{do} .

Background-image

: url(" "));

Background-position :

centre

Background-size :

cover

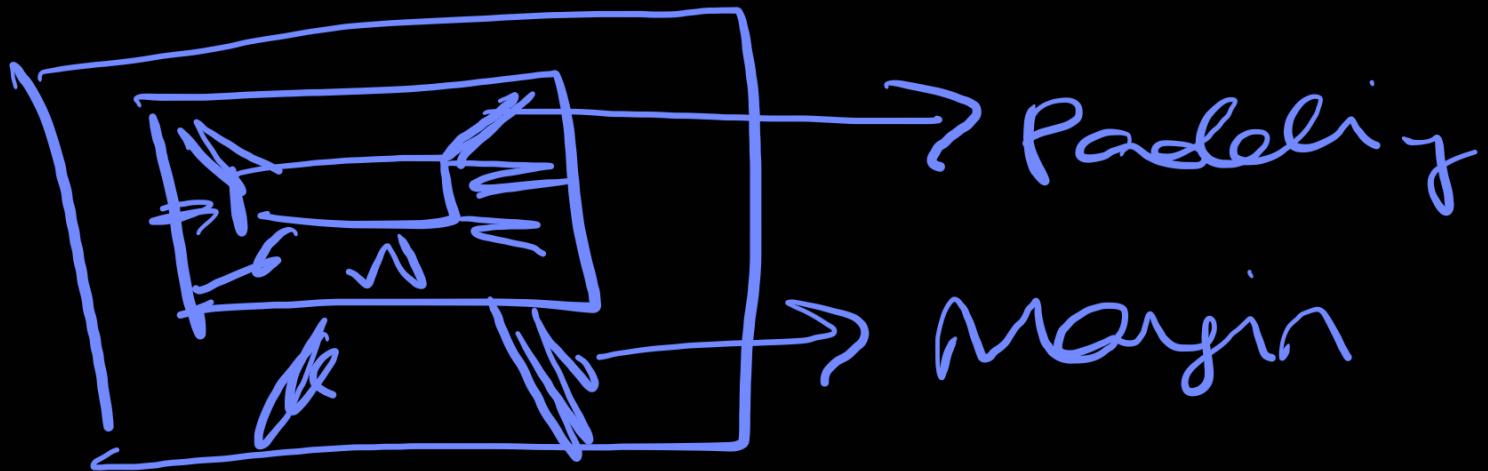

automatically
resizes fitting
for the window

size

margin

Padding mean
distances between

Content & Border

Margin mean distance
between borders

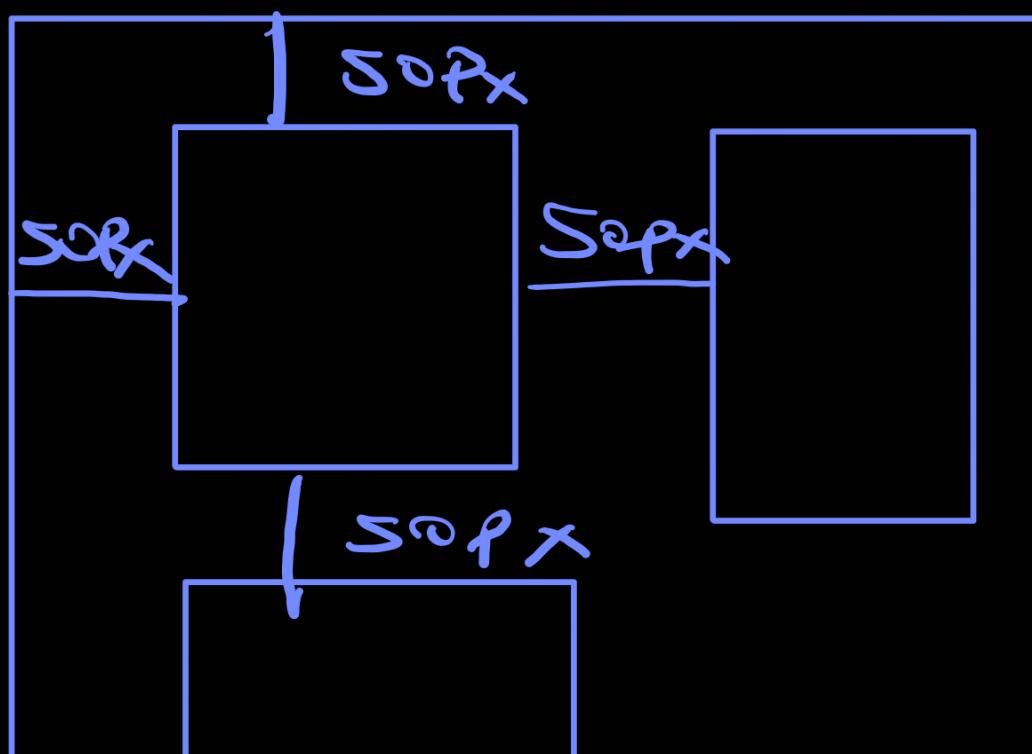

between border &

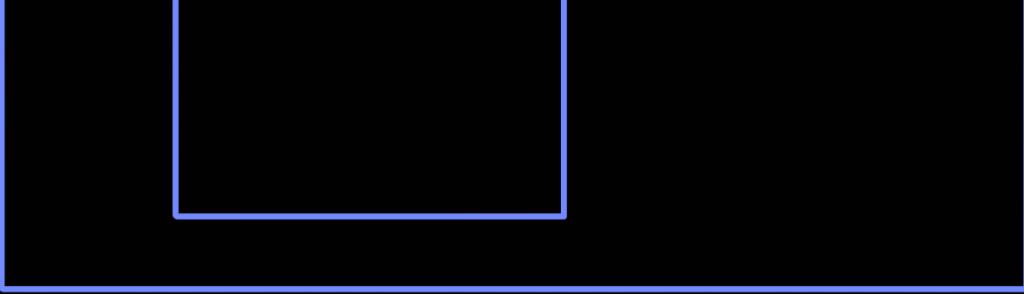

outside the border

Margin: 50px

all sides the
distance is 50px

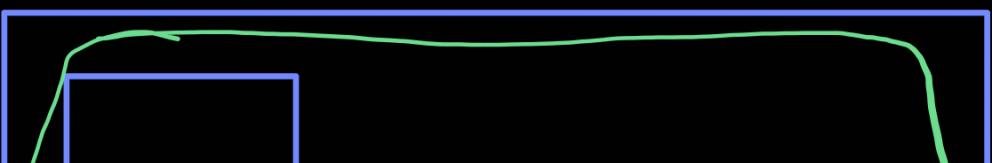

Margin-left: auto

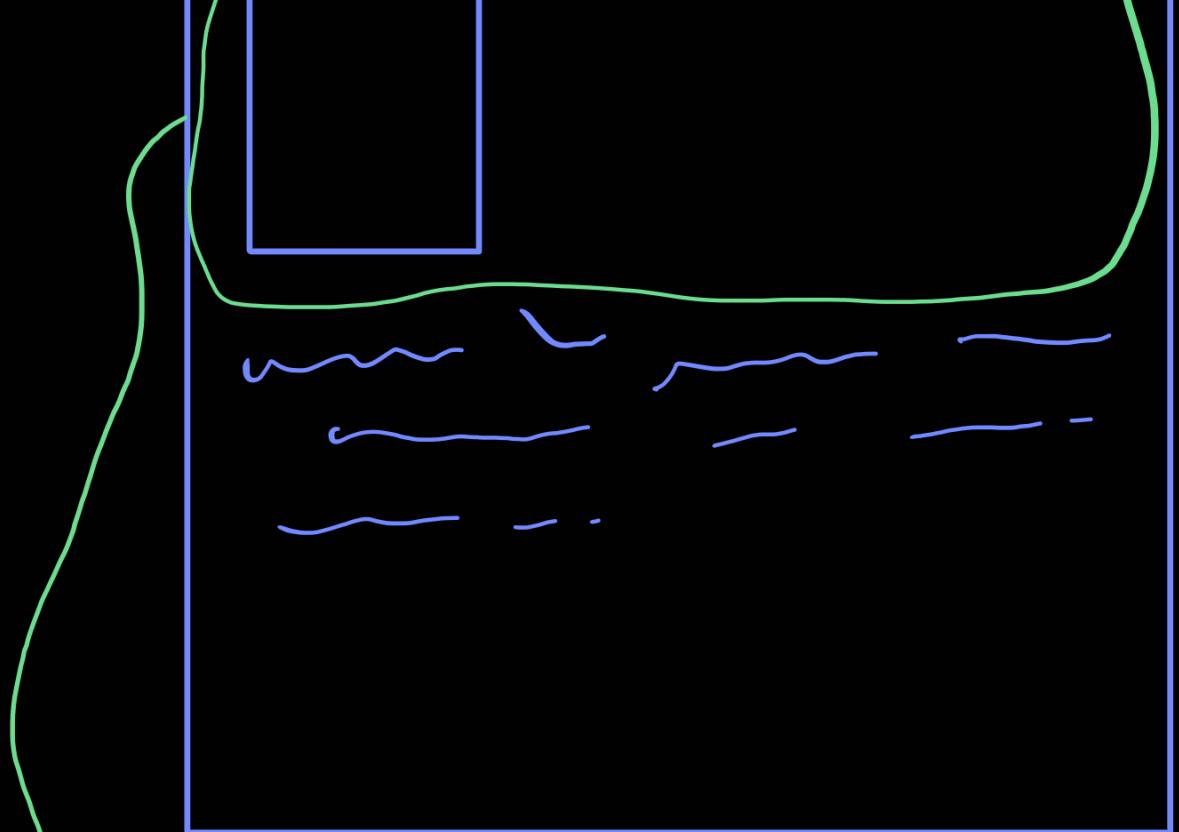

Margin-right: auto

Stays in the
centre.

float property

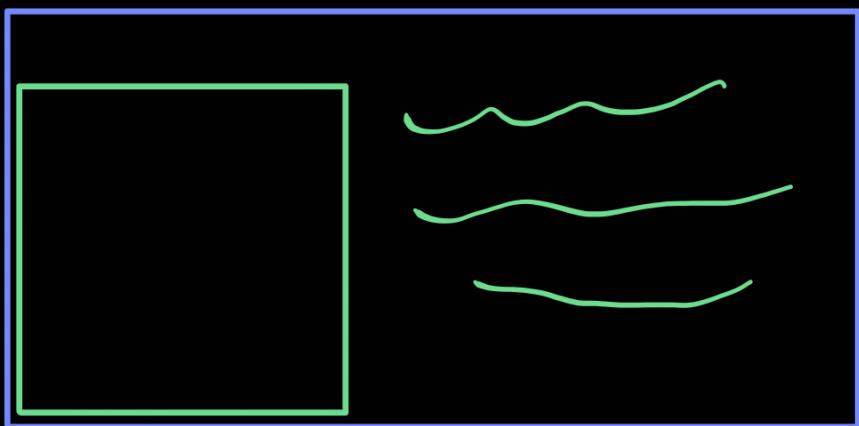

→ This full
region is
reserved for the
image.

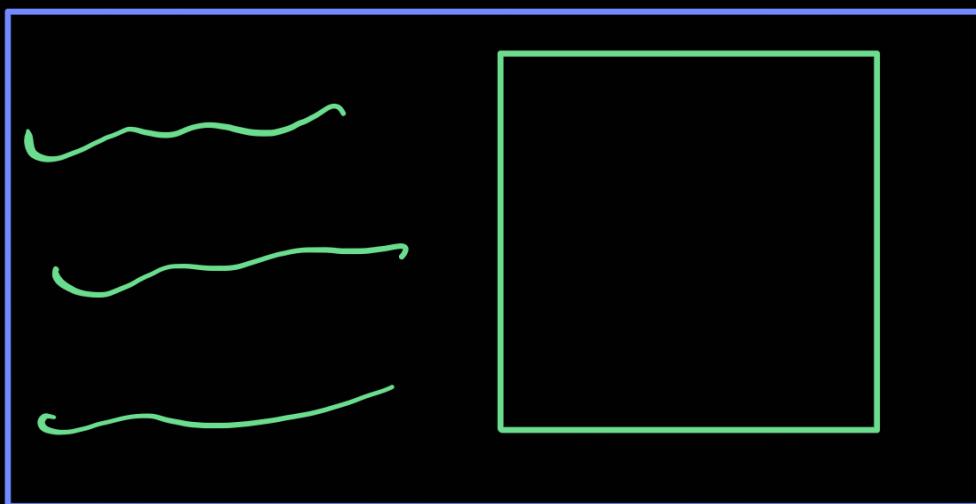

if we want

text in right or

left side

or

use float: right or
left

for keeping.
